

Name	Date	Activity	Note	Time spent			
Gustav		11/1 Lecture	Introduction to course and project	1,5			
Gustav		11/2 Inv work	Create git	0,5			
Gustav	2021-11-04	Seminar and workshop	Formation of team and discussion	4,5			
Gustav	11/8	Lecture and workshop	Discussion with partner	3			
Gustav	11/10	Discussion with partner	What lang to use and what should we do?	5			
Gustav	11/12	Seminar and workshop	Research	3			
Gustav	11/15	Lecture		3			
Gustav	11/16	Grp work	Test nominatim func	4			
Gustav	2021-11-17	Grp work	More Gps coding	5			
Gustav	2021-11-18	Seminar and workshop	Continues work on the simulator	4,5			
Gustav	2021-11-21	Grp work	Added flask API endpoints and data functions	2			
Gustav	2021-11-22	Lecture and workshop	Discussion about simulator structur and implement false safe, because of ip ban from Third Party API	3			
Gustav	2021-11-23	Inv work	Implement threading	5			
Gustav	2021-11-26	Seminar and workshop	Discussion about simulator structur	4,5			
Gustav	2021-11-28	Grp work	Finalise SMHI data collection	5			
Gustav	2021-11-29	Lecture		3			
Gustav	2021-12-02	Seminar and workshop	Tesing simulation with real address data	4,5			
Gustav	2021-12-04	Grp work	Create MySQL database, implement new simulator	6			
Gustav	2021-12-06	Lecture and workshop		3			
Gustav	2021-12-10	Seminar and workshop		3			
Gustav	2021-12-13	Inv work	Restructure simulator object form json file to objcets	5			
Gustav	2021-12-16	Presentation and rethink/discuss	Presented current state of the project and discused new addisions from what we saw	5			
Gustav	2021-12-28	Inv work	Restructure/Rebuild simulator	5			
Gustav	2021-12-29	Grp work	Restructure database	4			
Gustav	2021-12-30	Grp work	Update backend communication with database and implement werkzeug	8			
Gustav	2022-01-05	Grp work	Removed flask endpoints and impemented werkzueg api structure	10			
Gustav	2022-01-06	Grp work	Start to implement frontend and backend communication	10			
Gustav	2022-01-08	Grp work	Implement JWC to endpoints and admin functions	10			
Gustav	2022-01-09	Grp work	Update database and resctucture file system	10			
Gustav	2022-01-10	Grp work	Implement sphinx doc and update simulation functionality	10			
Gustav	2022-01-11	Grp work	Implement profile picture uploder and encoder so that forntend could recive it	10			
Gustav	2022-01-12	Grp work	Update simulation functions and implement test suite. Fix endpoints for frontend.	10			
Gustav	2022-01-13	Grp work	Fix endpoints for frontend.	10			
Gustav	2022-01-14	Grp work	Finalize report and code	10			
				190			
Edison		11/1 Lecture	Introduction to course and project	1,5			
Edison	2021-11-04	Seminar and workshop	Formation of team and discussion	4,5			
Edison	11/8	Lecture and workshop	Discussion with partner	3			
Edison	11/10	Discussion with partner	What lang to use and what should we do?	5			
Edison	11/12	Seminar and workshop	Research	3			
Edison	11/15	Lecture		3			
Edison	11/16	Grp work	Test nominatim func	4			
Edison	2021-11-17	Grp work	More Gps coding	5			
Edison	2021-11-18	Seminar and workshop	Continues work on the simulator	4,5			
Edison	2021-11-21	Grp work	Added flask API endpoints and data functions	2			
Edison	2021-11-22	Lecture and workshop	Discussion about simulator structur and implement false safe, because of ip ban from Third Party API	3			
Edison	2021-11-28	Individual work	Fixed a registration form and connected it with a mysql DB	3			
Edison	2021-11-26	Seminar and workshop	Discussion about simulator structur	4,5			
Edison	2021-11-28	Grp work	Finalise SMHI data collection	5			
Edison	2021-11-29	Lecture		3			
Edison	2021-12-01	Individual work	Fixed a simple login page and connected it to the api	4			
Edison	2021-12-02	Seminar and workshop	Tesing simulation with real address data	4,5			
Edison	2021-12-04	Grp work	Create MySQL database, implement new simulator	6			
Edison	2021-12-06	Lecture and workshop		3			
Edison	2021-12-10	Seminar and workshop		3			

Edison	2021-12-16	Presentation and rethink/discuss	Presented current state of the project and discussed new additions from what we saw	5			
Edison	2021-12-29	Grp work	Restructure database	4			
Edison	2021-12-30	Grp work	Update backend communication with database and implement werkzeug	8			
Edison	2022-01-02	Individual work	Authentication with JWT and bug fixes that came with it	4			
Edison	2022-01-03	Individual work	Fixed bad practise of doing api calls from the client.	3			
Edison	2022-01-05	Grp work	Removed flask endpoints and impemented werkzeug api structure	10			
Edison	2022-01-06	Grp work	Start to implement frontend and backend communication	10			
Edison	2022-01-08	Grp work	Implement JWC to endpoints and admin functions	10			
Edison	2022-01-09	Grp work	Update database and resctructure file system	10			
Edison	2022-01-10	Grp work	Implement sphinx doc and update simulation functionality	10			
Edison	2022-01-11	Grp work	Implement profile picture uploder and encoder so that forntend could recive it	10			
Edison	2022-01-12	Grp work	Fixed bad practise of doing api calls from the client.	10			
Edison	2022-01-13	Grp work	Fix endpoints for frontend.	10			
Edison	2022-01-14	Grp work	Finalize report and code	10
